Thanks, will include the Comms description, slightly longer than your description:

Week of November 30
Draft Updated Aquatic Life Criteria for Cadmium

I just signed the draft updated draft updated aquatic life criteria for cadmium this past Tuesday, Nov 24 and it is on it's way to OP/FRegister. We plan to publish next week for a 60-day public comment period. The cadmium criteria reflect newly-available toxicological data for aquatic organisms. The cadmium criteria were last revised in 2001. EPA's recommended water quality criteria provide technical information for states and authorized tribes to establish water quality standards under the Clean Water Act. (Communications: desk statement, Water Headlines, stakeholder notifications)
